

AKI GIAKA ISAAC

Lighting Designer

I'm a lighting technician, with a decade and half experience in the lighting industry, from stage lighting and rigging to club lighting. I'm a freelancer, I resigned from my previous place of work because I felt they were limiting me, and my passion was not finding full expression. Consoles I know how to use are:

1. GrandMA2 (Once own Command wing).
2. Avolite (mostly use it for my club installation job)
3. ChamSys magicQ (ONPC, used for several club and lounge installation).
4. I have basic knowledge on Madrix. I can use it for simple LED pixel mapping.
